

Hirak Sarkar

8 Acorn Ln
Stony Brook, NY-11790
Mob No.+1 6315208131

email: hsarkar@cs.stonybrook.edu
WWW: www.hiraksarkar.com

Education

- | | |
|---|-----------------------|
| Ph.D in Computer Science | 2014 - <i>present</i> |
| Statistical Inference in Biological Data, <i>advisor: Prof. Rob Patro</i>
Stony Brook University, NY | |
| Masters of Technology (Computer Science) | 2011-2013 |
| Indian Statistical Institute
1 st Class (Hons.) | |
| Bachelor of Technology (Computer Science and Engineering) | 2007-2011 |
| West Bengal University of Technology
GPA: 8.88/10 | |

Publications

- [Fast, Lightweight Clustering of de novo Transcriptomes using Fragment Equivalence Classes](#) A Srivastava*, Hirak Sarkar*, Laraib Malik and Rob Patro (* *Joint first authors*) **RECOMB-seq'16**.
- [RapMap: A Rapid, Sensitive and Accurate Tool for Mapping RNA-seq Reads to Transcriptomes](#) A Srivastava, Hirak Sarkar, Nitish Gupta and Rob Patro **ISMB'16**.
- [“Voronoi Game on Graphs”](#) (Extended version) S. Bandyapadhyay, A. Banik, S. Das and H. Sarkar (in alphabetical order of surnames) *Journal of Theoretical Computer Science* 2015.
- [“Voronoi Game on Graphs”](#) . S. Bandyapadhyay, A. Banik, S. Das and H. Sarkar (in alphabetical order of surnames) Seventh International Workshop on Algorithms and Computation (WALCOM), February 2013.

Programming Skills

C,C++,Python

Open Source Tools Used

Dendropy, BioNet (Comp Bio)
NLTK, Scrapy, Scikit-learn, Stanford Parser, Pandas (Data Science)

Relevant Coursework

- Artificial Intelligence, Computational Biology, Analysis of Algorithms, Fundamental of Networks. (at *SBU*)
- Machine Learning & Pattern Recognition, Image Processing, Stochastic Process, Optimization Algorithms, Computer Graphics. (at *Indian Statistical Institute*)

Relevant Course Projects

- *IPID Header Survey*: We used IPID headers to estimate the load over different servers, sampled from alexa list. The main challenge of the project is to detect the wrapping pattern and navigate through the global vs local IPID counter. We also looked at the temporal pattern of for the different regional websites which shows interesting correlation with possible working load at the server end.
Instructor: Prof. Phillipa Gill
- *Classification & Clustering of satellite images*: We benchmarked different classification algorithms to cluster different kind of landmasses from infrared images taken by satellite.
Instructor: Prof. C A Murthy
- *Some Geometric and Combinatorial Properties of Binary Matrices Related to Discrete Tomography*: Here we are trying to decompose an image matrix into matrices each having orthogonal convex polygon also known as Ferrer's digraph. An operation could regenerate the original image from these matrices. The methods can be applied to image and data compression.
(Masters dissertation) Advisor: Prof. Bhargab B Bhattacharya & Prof. Sandip Das
- *GameSAT- A Structured Approach to Combine SLS SAT Solvers*: Here we used several existing heuristic algorithms to mix up with each other in a customized probability to solve combinatorial hard problems encoded as SAT problems. We used UBCSAT framework for experimentation.
(B.Tech dissertation) Advisor: Ashiqur KhudaBukhsh, CMU
- *ET_EX to HTML converter*: Implementation of L^AT_EX to HTML using LEX and YACC tool.
Instructor: Prof. Mandar Mitra
- *InstAntroid- A Real-time Android Media Surfer*: We have designed intelligent searching mechanism which could judge the taste of the user and instantly find out the most probable result. We also have designed instant search with it in the android platform. The whole algorithm is implemented on top of a music player application. *Advisor: Kousik Dasgupta*
- *ISHARA- A Software Hardware Interface for Human Computer Interaction(HCI)*: We have used standard computer vision algorithms to track finger movements. OpenCV library is used with VC++ platform is used for implementation of the project.

Experience

- *Junior Research Fellow* in Department of Computer Science & Engineering at Indian Institute of Technology, Kharagpur (IIT) from July, 2013 to Sept, 2013. I was a member of Complex Network Engineering Group. I did TA-ship for Introductory Programming Course in that brief stint.
- *Visiting Researcher* at Advanced Computing & Microelectronics Unit, Indian Statistical Institute from October, 2013 to December, 2013. I worked on Computational Geometry and Graph Theory
- Teaching Assistant for CSE549 (Computational Biology), CSE219 (Game Programming)
- *Summer Assistantship* with Prof. Rob Patro from May, 2015 to July, 2015. We worked on Alignment free network clustering algorithm.
- *Summer Assistantship* with Prof. Adam Seipel from May, 2016 to July, 2016, at Simons Center for Quantitative Biology, Cold Spring Harbor Lab.

Awards and Honors

- Awarded *Special CS Chair Fellowship (of \$10000)* from Stony Brook University.
- Awarded *Masters Scholarship* by Ministry of Statistics and Programme Implementation, Govt. of India.
- Awarded *NUS Research Scholarship* from National University of Singapore. *(Discontinued after 6 months)*
- Received **First Prize** for project ISHARA in INNOVA contest organized by Institute of Engineering and Management(IEM) Calcutta.
